

EAGLE

STORAGE HOPPERS

PORTABLE STORAGE HOPPERS FOR LOW COST STORAGE AND MATERIAL TRANSFER

The Eagle Port-A-Bin is an economical way to store and then transfer material. The units are square and stack three high. Angled stack pads make stacking a breeze.

The hoppers are equipped with slide shut-off gates for gravity discharge and have the option of being equipped with vacuum ports for vacuum discharge. Gravity discharge is facilitated by a steep hopper slope. Either one piece or two piece hinged covers are available.

Port-A-Bin models can be equipped with four way fork pockets, bag break grids, magnet gates, butterfly valves, material card holders, and many other custom Features.

Because the hoppers are portable, your production operations become more efficient. Hoppers can be equipped with casters for another mobile dimension.

The Eagle Port-A-Bin

PRODUCT OVERVIEW
