MOBILE TILT STANDS

Eagle Tilt Stands are rugged, dependable, long lasting machines designed to increase operator comfort and reduce strain.

The design of the floor level tilt stand allows for easy loading and unloading of material containers. Fork lift or hand trucks can be conveniently utilized. Tilting bulk material containers allows complete vacuum discharge without the need of continuous monitoring. As the bulk materials weight within the container is reduced, the tilter automatically tilts, moving material into one corner for removal.

The Eagle Tilt and Lift Units can be utilized for multiple applications that require parts removal from bulk containers or for simple removal of bulk materials from containers. Designed to handle up to 48" x 48" containers, weighing from 1,000 lbs. to 2,500 lbs. The lower lip of the container is able to move from 14" off the floor to 32".

Model 30-300

PRODUCT OVERVIEW

1,500 – 2,500 lb. Capacity

45 Degree Tilt Angle Produced by an Air Bag Device

Minimum Air Pressure Required: 40 psi

Maximum Air Pressure Required: 100 psi

Dimensions; 52" x 72" x 36" High

Base Frame and Tilter Bucket are 7 Gauge Steel

Control Unit: With Pressure Regulator and Gauge

Vacuum Wand Holder: 3/4" Diameter Steel

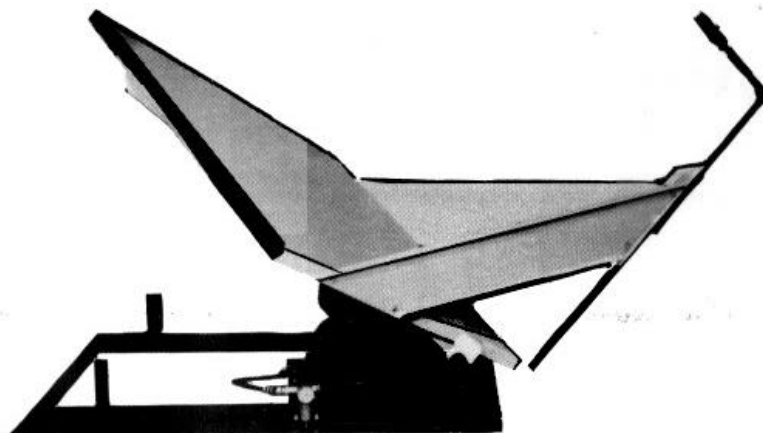

Optional Hand or Foot Valve Control

Shipping Weight: 370 lbs.

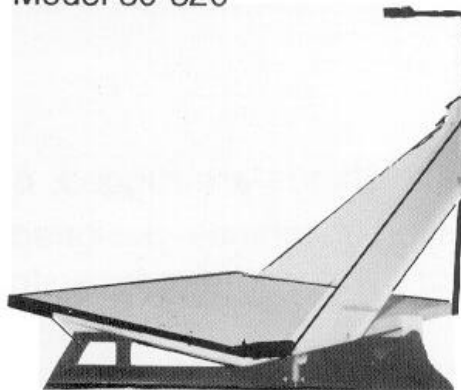

Optional Electric or Air Vibrator with Timer Control

Fork Lift Movable

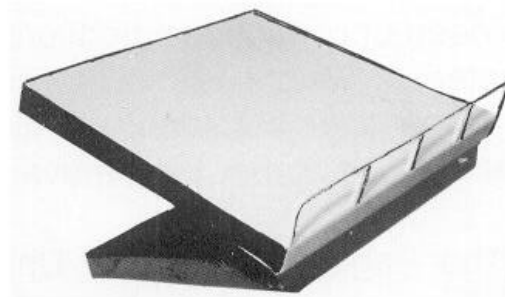

Finish: Vista Gray Epoxy
